ALAMEDA PHOTOGRAPHIC SOCIETY

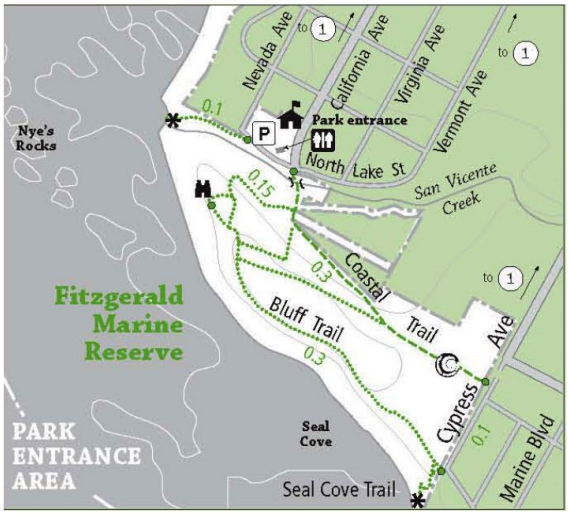
Field Trip Series

Fitzgerald Marine Reserve

Friday, March 10, 2017 at 2:00 pm

(Rescheduled due to Feb date Rain-out)

It's a sort of treasure hunt for sea creatures and life among the awesome tide pools. On this day, we'll take advantage of really low tide to expose sea creatures living among the crevices at Fitzgerald Marine Reserve. Low tide is at **3:18 pm**. We would start at 2pm. Sun sets at 6:11 pm.



Location:

Fitzgerald Marine Reserve
200 Nevada Ave.
Moss Beach, CA 94038.

Afterwards we can stay for the sunset and optional dinner out.

If you want to carpool from Alameda please contact David Weintraub davidweintraub2@comcast.net or at (510) 521-0603 by Monday, March 6th. Carpoolers meet in front of Kohl's at Alameda South Shore Shopping Center at 1:00 pm. Otherwise directions are on the back of this flyer.

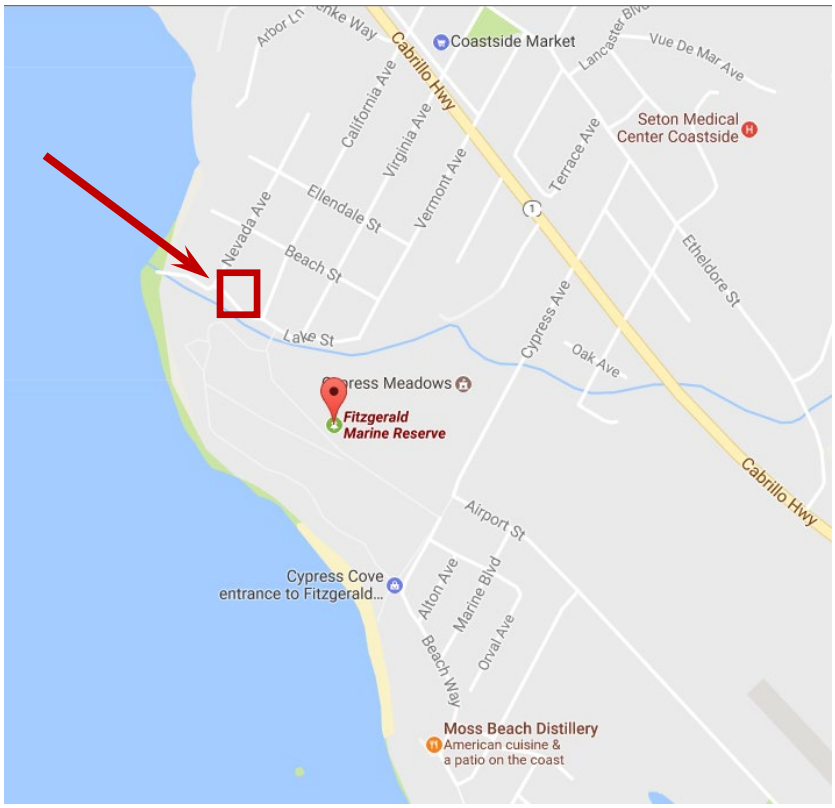
Don't forget your wider angle lenses as you are likely to be close to your subjects.
It will be chilly so dress in layers and bring a warm coat that can serve as a windbreaker. Even at low tide there is water all around and slippery rocks, so bring sturdy shoes with good rubber soles. An extra towel and dry socks may be a good idea as well.

For more information on the Marine Reserve there is an excellent self-guide you can download to your smart phone or print out and bring with you at http://www.fitzgeraldreserve.org/newffmrsite/wp-content/uploads/2013/09/Fitzgerald_Self-Guide-Broch_9-13.pdf

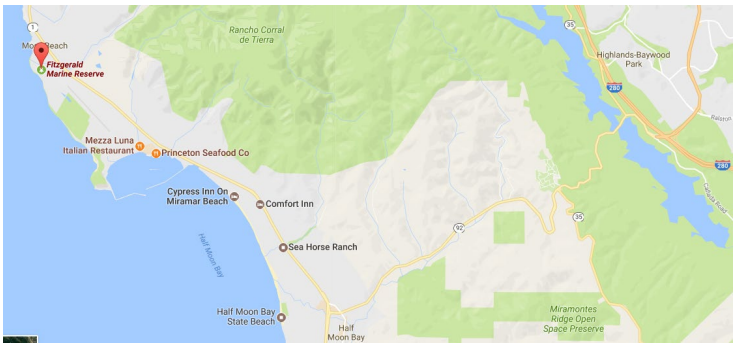
See additional map details on back.

Fitzgerald Marine Reserve, Friday, March 10, 2017 at 2:00 pm

Located at end of California Avenue and Lake Street, Moss Beach, CA



Fitzgerald Marine Reserve is located west of Highway 1 in Moss Beach, 7 miles north of Half Moon Bay, or 21 miles south of San Francisco.

From Highway 1 at Moss Beach, turn west on California Avenue and proceed to the parking lot at the end of the street. The reserve's main entrance is at the end of California Avenue.


If coming from San Mateo bridge, allow 45 minutes to reach the reserve from the intersection of Highways 280 and 92.
